IMFA managing director Subhrakant Panda re-elected ICDA president

MUMBAI (Metal-Pages) 09-May-13. Ferro-chrome producer Indian Metals & Ferro Alloys (IMFA) said that Subhrakant Panda has been re-elected president of the International Chromium Development Association (ICDA), the Paris-based apex body of the chromium industry.

Subhrakant Panda is the managing director and CEO of IMFA, a fully integrated producer of value-added ferro chrome with a capacity of 275,000 tonnes per year.

IMFA was one of the founding members of ICDA when it was formed in 1984 and Panda is only the third Indian to head the organisation in its nearly three decades of existence.

ICDA's Council comprising of chrome ore, ferro-chrome and stainless steel producers from around the world in addition to other processors and leading trading houses is tasked with managing the affairs of the organisation.
